LEADERSHIP PROFILE

TPM leader translating ambiguous strategy into measurable execution across engineering, product, security, data, legal, finance, and customer teams.

Known for crisp operating cadence, data-backed decisions, and calm escalation management for business-critical launches.

EDUCATION

M.S., Computer Science

University program focused on distributed systems, databases, and software engineering.

B.E., Engineering

Technical foundation in systems thinking and product delivery.

CERTIFICATIONS

PMP - Certified ScrumMaster -
AWS Cloud Practitioner - SAFe
Agilist

Senior Technical Program Manager with 12+ years leading complex software, cloud, data, and AI-enabled platform initiatives from concept through launch. Builds trusted cross-functional teams, removes delivery friction, and converts strategy into reliable execution systems that improve customer outcomes, operational efficiency, and executive visibility.

EXPERIENCE

Senior Technical Program Manager

2021?Present

Enterprise Cloud & AI Platform Organization

- Own end-to-end delivery for strategic cloud, data, and AI platform roadmaps spanning 8+ engineering squads and multiple business stakeholders.
- Established planning rituals, dependency maps, launch reviews, and risk burn-down dashboards that improved release predictability by 30%.
- Led executive operating reviews for capacity, budget, privacy, compliance, customer adoption, and incident-readiness decisions.

Technical Program Manager

2017?2021

SaaS Product & Infrastructure Teams

- Delivered API modernization, identity, analytics, and reliability programs serving enterprise customers across regulated environments.
- Coordinated product, engineering, SRE, security, support, and go-to-market milestones for launches with zero critical customer escalations.
- Introduced KPI scorecards and retrospectives that surfaced scope tradeoffs earlier and increased stakeholder confidence.

Program Manager / Engineering Lead

2012?2017

Digital Transformation & Systems Integration

- Managed distributed teams delivering enterprise workflow, reporting, migration, and integration programs for global clients.
- Translated customer requirements into technical plans, release schedules, test strategy, and adoption playbooks.

SELECTED ACHIEVEMENTS

AI platform launch

Coordinated model evaluation, responsible-AI controls, telemetry, and rollout gates to move a new AI-assisted workflow from pilot to production.

Cloud migration

Orchestrated phased customer migration plan, dependency sequencing, and support readiness that reduced cutover risk and accelerated adoption.

Operational excellence

Built a single source of truth for risks, milestones, decisions, and metrics, enabling faster executive decisions and fewer late surprises.

Customer trust

Partnered with security and legal teams on privacy reviews, compliance evidence, and incident playbooks for enterprise readiness.
